System Information Worksheet

Use the system information worksheet to record the information that is needed to install the ME5 Series Storage System.

ME5 Series Storage System information

Gather and record the following information about the ME5 Series Storage System network and the administrator user:

Table 28. ME5 Series Storage System management network

Item	Information
Service tag	
Management IPv4 address (ME5 Series Storage System management address)	_____ . _____ . _____ . _____
Top controller module IPv4 address (Controller A MGMT port)	_____ . _____ . _____ . _____
Bottom controller module IPv4 address (Controller B MGMT port)	_____ . _____ . _____ . _____
Subnet mask	_____ . _____ . _____ . _____
Gateway IPv4 address	_____ . _____ . _____ . _____
Gateway IPv6 address	_____ :_____ :_____ :_____::_____
Domain name	
DNS server address	_____ . _____ . _____ . _____
Secondary DNS server address	_____ . _____ . _____ . _____

Table 29. ME5 Series Storage System administrator

Item	Information
Password for the default ME5 Series Storage System Admin user	
Email address of the default ME5 Series Storage System Admin user	

iSCSI network information

For a storage system with iSCSI front-end ports, plan and record network information for the iSCSI network.

(i) **NOTE:** For a storage system deployed with two Ethernet switches, Dell recommends setting up separate subnets.

Table 30. iSCSI Subnet 1

Item	Information
Subnet mask	_____ . _____ . _____ . _____

Table 30. iSCSI Subnet 1 (continued)

Item	Information
Gateway IPv4 address	_____ . _____ . _____ . _____
IPv4 address for storage controller module A: port 0	_____ . _____ . _____ . _____
IPv4 address for storage controller module B: port 0	_____ . _____ . _____ . _____
IPv4 address for storage controller module A: port 2	_____ . _____ . _____ . _____
IPv4 address for storage controller module B: port 2	_____ . _____ . _____ . _____

Table 31. iSCSI Subnet 2

Item	Information
Subnet mask	_____ . _____ . _____ . _____
Gateway IPv4 address	_____ . _____ . _____ . _____
IPv4 address for storage controller module A: port 1	_____ . _____ . _____ . _____
IPv4 address for storage controller module B: port 1	_____ . _____ . _____ . _____
IPv4 address for storage controller module A: port 3	_____ . _____ . _____ . _____
IPv4 address for storage controller module B: port 3	_____ . _____ . _____ . _____
Gateway IPv6 address	_____ :_____ :_____ :_____::_____

Additional ME5 Series Storage System information

The Network Time Protocol (NTP) and Simple Mail Transfer Protocol (SMTP) server information is optional. The proxy server information is also optional, but it may be required to complete the Discover and Configure Uninitialized wizard.

Table 32. NTP, SMTP, and Proxy servers

Item	Information
NTP server IPv4 address	_____ . _____ . _____ . _____
SMTP server IPv4 address	_____ . _____ . _____ . _____
Backup NTP server IPv4 address	_____ . _____ . _____ . _____
SMTP server login ID	
SMTP server password	
Proxy server IPv4 address	_____ . _____ . _____ . _____

Fibre Channel zoning information

For a storage system with Fibre Channel front-end ports, record the physical and virtual WWNs of the Fibre Channel ports in fabric 1 and fabric 2. This information is displayed on the Review Front-End page of the Discover and Configure Uninitialized wizard. Use this information to configure zoning on each Fibre Channel switch.

Table 33. WWNs in fabric 1

Item	FC switch port	Information
WWN of storage controller A: port 0		
WWN of storage controller B: port 0		
WWN of storage controller A: port 2		
WWN of storage controller B: port 2		
WWNs of server HBAs:		

Table 34. WWNs in fabric 2

Item	FC switch port	Information
WWN of storage controller A: port 1		
WWN of storage controller B: port 1		
WWN of storage controller A: port 3		
WWN of storage controller B: port 3
